Master VIN list

All VINs in the series from from 2000000-2021000 have been checked.

This is a complete list of VINs that validate as being 1993 Commemorative Edition cars. This list does not account for special builds that do not follow the VIN search criteria for Commemorative Edition cars unless indicated. The series number (xx of 325) as indicated on the brass plaques placed in each car don't necessarily correspond with the individual build number. This could indicate that the cars were numbered all at once and not when individually built. Although the production number is stated to be 325, the SAAB Museum at Trollhättan informs that only 314 examples were actually built--this search confirms that. Cars that are in the [registry](#) have their series number here. If the build number is unknown, it is indicated with a (?).
