Master VIN list

All VINs in the series from from 2000000-2021000 have been checked through reporting services.

This is a complete list of VINs that validate as being 1993 Commemorative Edition cars. This list does not account for special builds that do not follow the VIN search criteria for Commemorative Edition cars, unless indicated. The series number (xx of 325) as indicated on the brass plaques placed in each car does not necessarily correspond with the individual build number. This could indicate that the cars were numbered all at once and not when individually built. Although the production number is stated to be 325, the SAAB Museum at Trollhättan reports that only 314 examples were actually built--this search confirms that. Cars that are in the registry have their series number indicated in black text here. If the build number is unknown from a misplaced plaque, it is indicated with a (?). **NOTE:** #s in GREEN are assumed series numbers based on infilling between known series numbers but are not confirmed.
